DETAILED ACTION

This Office Action is in response to the Amendment filed on Oct. 17, 2005.

Claims Allowed: 1-51.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

As pointed out by the Applicants in the Remark that the cited prior art (Tremblay et al. [6,014,723] and Spencer [6,240,499]) taken alone or in combination fail to teach, in combination with the other claimed limitations, a method for accessing memory array comprising: *"dynamically declaring a dimensional dynamic overlay on the data contained within the one-dimensional array from within a block of statements in a subroutine to initialize attributes within an array attribute storage object, wherein the dynamic overlay is defined within the subroutine and provides a dimensional view on the one-dimensional array, the dimensional dynamic overlay being capable of providing a view of at least two dimensions on the one-dimensional array; and accessing the data from within the block of statements as a dimensional indexed array using the array attribute storage object, and wherein the allocated memory of the one-dimensional array remains persistent and is referenced within the array attribute storage object"* as recited in such a manner in each of independent claims 1, 7, 14 and 42.

As pointed out by the Applicants in the Remark that the cited prior art (Tremblay et al. [6,014,723] and Spencer [6,240,499]) taken alone or in combination fail to teach, in combination with the other claimed limitations, a method for processing a data array comprising: *"declaring a data array within the block of statements, including a*

dimensional dynamic overlay to provide a dimensional view on a one-dimensional array associated with contiguous memory locations, the dimensional dynamic overlay being capable of providing a view of at least two dimensions on the one-dimensional array, and wherein the contiguous memory locations are persistent and the dimensional dynamic overlay includes references to the contiguous memory locations to form the dimensional view; setting an array boundary policy for the data array which is defined with or referenced by some of the block of statements, wherein the array boundary policy dictates run-time actions of the software program that are executed, if during execution of the software program, the data array is accessed outside its boundaries, and wherein the array boundary policy is configurable and user-defined” as recited in such a manner in each of independent claims 22, 34, 38 and 48

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
